

Take part in a study to learn about dementia rehabilitation

We are seeking health professionals to participate in this study funded by the Commonwealth Government Medical Research Future Fund

Am I eligible to participate in the study?

You are eligible if you:

- are a health professional working with people with dementia e.g., an allied health professional, nurse or a doctor, **or** work in a RAS, ACAT or NDIS role where you help people with dementia access services
- work in Eastern Melbourne or South Eastern Melbourne primary health network areas with community dwelling older people

Why should I take part in this study?

- Gain access to dementia-specific rehabilitation resources and a community of practice that may enhance the care, wellbeing and quality of life for people with dementia and their care partners.

What will it involve?

- Participating in a dementia rehabilitation e-module and community of practice
- Complete three online surveys before, during and after the study.
- The total time for all activities will be approximately 15 hours in duration over 12 months (January 2024 to January 2025).

Who can I contact to participate?

Please contact Dr Angel Lee (Monash University) email: angel.lee@monash.edu

Please reply by 31/12/2023
